

Synchronous Motor for Mill  
TM、TMQ、TMW 系列  
磨煤机同步电机

## 1 概述

TM、TMQ、TMW 系列矿山球磨机用高压三相同步电动机，是根据引进国内外大量先进技术，结合我公司设计、制造特点而研制的新系列产品。该类电机是与矿山球磨机配套的专用系列产品。

本系列电机的研发采用了先进的计算分析技术，加上制造中采用上乘的材料和精良的工艺，使得该系列电机具有结构紧凑、振动小、噪音低、运行可靠、安装维护方便等优点，是新一代、高性能的矿山球磨机驱动设备。

本系列电机的功率等级、安装尺寸、电气性能均符合 GB755、IEC 标准及相关国家标准要求。其中 TMQ 系列高起动转矩电机符合 JB1473《传动矿山磨机用大型交流三相同步电动机技术条件》。标准的防护等级为 IP20 或 IP21，冷却方式采用开启式自通风冷却或管道通风冷却，根据用户实际需要也可制成其他防护等级和冷却方式。本系列电机的轴承均采用具有自润滑功能的滑动轴承。

TM、TMW 系列电机须采用空气离合器和球磨机联接，TMQ 系列电机具有高起动转矩、高牵入转矩特性，该电机与球磨机可不需要空气离合器而进行直联。

系列电机的基本安装方式为卧式 IM7311，符合 GB997 和 IEC34-7《电机结构及安装型式代号》的规定。

## 1 General description

TM、TMQ、TMW Series synchronous motor, for ball mill application, are our new products which absorbed the latest technology of both domestic and abroad, designed and manufactured by our company. The series of motors are especially for mine mill machines.

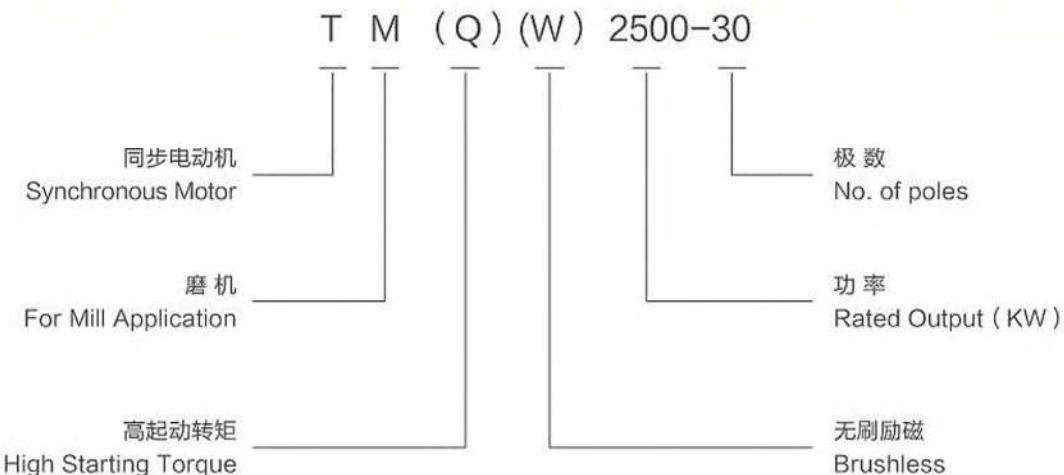

In order to develop these series motors, advanced analytic and calculation technology had been used, fine materials and excellent workmanship were also adopted during manufacturing. All of those give series motors compact structure, low vibration, low noise, high reliability, convenient for installation and maintenance.

The power grade, installation dimension and electric property of these series motors comply with Chinese Electrical Standard GB755, IEC Standard and relevant national standards. The TMQ series high starting torque motors comply with JB1473《Technical specification for driving mine mill large AC three-phase synchronous motor》. The standard protection degree of series motors is IP20 or IP21, which adopt open-type self-ventilated or pipe-ventilated cooling type, other protection degrees and cooling types are also available if required by customers. These series motors use self-lubricating sliding bearing.

TM、TMW series motors should use airclutch to couple with mill machines, While TMQ series motors could be directly coupled with mill machines without airclutch due to its high starting torque and high pull in torque characteristics.

Basic mounting type for series motors is horizontal IM7311, which comply with relevant standards of GB997 and IEC34-7《The motor structure and mounting type code》.

## 2 型号说明 / Type Designation

# TM、TMW系列磨煤机用高压同步电动机

## TM、TMW Series HV Synchronous Motor

### 3 性能特点

本系列电机额定电压 6kV 或 10kV，额定频率 50 或 60Hz，额定功率因数 0.9( 超前 )。也可根据用户要求提供其它电压等级、其它频率范围、不同功率因数的同类派生产品。

本系列电机采用全电压直接起动。如用户电网容量不够，在起动转矩能满足要求的情况下也可采用降压起动 ( 如：软起动 )。

本系列电机具有结构紧凑、效率高、过载能力强、振动小、安装维护方便等显著特点。传统直联齿轮联轴器结构的电动机具有较大的堵转转矩，要求能直接启动带一定负载的球磨机，电动机的堵转电流大，对用户电网要求较高。采用空气离合器联接结构的电动机，轴中心打有通孔，尾端带压缩空气接口法兰，电动机的堵转电流小，对电网要求较低。

### 3 Performance Characteristics

These series motors have two rated voltage classes with 6KV or 10KV, rated frequency 50HZ or 60HZ, rated power factor 0.9 (Lead). If required different voltage class, frequency and power factor, we can supply the same kind derived products as well.

These series motors adopt full voltage direct starting type. If the user's power network capacity is not enough, reduced voltage starting (such as soft start) can also be adopted if starting torque meets the requirement.

These series motors have outstanding characteristics such as compact structure, high efficiency, better overload capacity, low vibration, convenient for installation and maintenance. The motors which adopt traditional direct gear coupling structure will bring high rotor torque, it demands to drive the mill machine with regular load directly, these series motors have high stall current, therefore request for a good power network capacity. The motors which adopt airclutch coupling type have a through-hole in the shaft center, with compressed air interface flange at the end, these series motors will have low stall current, no special requirement to normal power network capacity.

### 4 结构简介

主电机采用座式轴承，带底架安装，电机底部出线。

定子铁芯采用优质硅钢板冲制叠压而成，机座采用钢板焊接结构，整机绝缘等级 F 级，定子绕组采用真空压力 ( VPI ) 浸漆处理技术。

转子磁极铁芯采用优质钢板冲制叠压而成，磁极绕组采用铜母线绕制，磁极线圈对地绝缘采用整体烫包技术，单极采用 VPI 真空压力浸漆处理后，很大程度上提高了磁极线圈的防潮、防霉能力，磁极通过高强度螺栓固定在转子支架的磁轭上。磁轭为钢板焊接结构，磁轭内圈通过过盈量将扭矩传递到主轴。采用空气离合器联接的电机主轴上需要打通孔用于压缩空气通过。

### 4 Motor structure

The main motors adopt pedestal bearing, with mounting type base frame and the cable lead out from the bottom of motors.

The stator cores are precision-stamped from high quality silicon steel plate, a steel plate welded construction has been used on the frame, the insulation class of series motors is class F, and the stator winding is vacuum pressure impregnated(VPI).

The rotor iron cores are precision-stamped from high quality steel plate, the pole winding uses TMY, and entirely cladding technology was adopted to the pole coil for ground insulation, after VPI on the monopole, the pole coil's anti-humidity and mould proof ability will be highly increased. The magnetic pole is fixed on the magnetic yoke of rotor supported by high strength bolt. A steel plate welded construction has been used on the magnetic yoke, the torque is transmitted to the main shaft through magnitude of interference from magnetic inside track. The main shaft which uses airclutch coupling should be with a through hole for the compressed air circulating.

### 7 | 订货须知

请在订货时注明以下参数

电机型号（举例）	TM2500-30
额定功率 (kW)	2500
额定电压 (kV)	6
极 数	30
额定频率 (Hz)	50
旋转方向	顺时针（从磨机看电机方向）
防护等级	IP20
冷却方式	IC01
安装方式	IM7311
工作定额	S1

### 7 | Required Data

The following data is required for type selection

Type of motor	TM2500-30
Rated power(kW)	2500
Rated voltage (KV)	6
Number of poles	30
rated frequency(Hz)	50
Direction of rotation	Clockwise (View from mill machine to motor)
Protection degree	IP20
Type of cooling	IC01
Type of mounting	IM7311
Duty type	S1

#### 特别说明

随着企业技术进步及相关国家标准修订，涉及技术参数及安装尺寸调整，恕不另行通知！订货时以供需双方签订的外形图为准。

#### Declaration

The information provided in this Brochure contains merely general descriptions, characteristics of performance or dimensions which in case of actual use do not always apply as described or which may change as a result of further development of the products or IEC/GB standards.
